

## MAXETA™ iFA SERIES DC/DC POWER MODULES 48V Input, 28V Output, 504W Full Brick

The Maxeta™ series power modules are ideally suited for wireless applications to power various RF amplifiers. With a 91% typical full load efficiency, a power density greater than 91W per cubic inch and a total power and current output capability of 504W and 18A respectively, the Maxeta™ series offers the highest efficiency, power density and usable power in a standard full brick package currently available. A wide output voltage trim range, -40% to +10%, remote sensing, power good indication, isolated remote on/off control and single wire active current sharing are standard features enhancing versatility. The Maxeta™ series modules are also suited for other telecommunication applications.
